Please Protect Bozeman’s URBAN WILDLIFE

Our area is home to many types of wildlife, both big and small. Songbirds are migrating through Montana, and small mammals and amphibians are making new homes for their young. Please respect the animals and do not disturb them. It is against the law to remove animals, except legally caught fish, from public parks. Keep pets leashed in wildlife habitat areas and do not let animals wander unsupervised.

The Audubon Society recommends that cat owners keep cats indoors, especially during migration season, and not placing bird feeders where cats are present. Domestic cats account for thousands of songbird deaths every year.

Thank You for protecting Bozeman’s Wildlife!
