

Dear Customer:

Environmental Protection Agency regulations for the National Pretreatment Program require that the City of Bozeman establish a pretreatment program as a condition of its National Pollutant Discharge Elimination System Permit. As such, the City of Bozeman has established its pretreatment program as included in Chapter 40 Article 3 of the City of Bozeman's Municipal Code.

In order to control pollutant discharges and protect the Publicly Owned Treatment Works (POTW) the general pretreatment regulations which apply to all industrial and commercial customers prohibits the discharge of pollutants.

If you have questions regarding this survey or the City's Pretreatment Program, please contact the Pretreatment Coordinator at 406-582-2925.

Sincerely,

Craig Woolard, Ph.D., P.E.
Director of Public Works

Do any of the below criteria apply to your business? If yes, please fill out the attached survey.

- Discharge wastewater other than domestic use of restrooms, showers, kitchens, and laundry rooms.
- Discharge from manufacturing process.
- Discharge in excess of 25,000 gallons per day of process wastewater.
- Not applicable
